SHARMILA BODDETI

Senior Workforce Management & Talent Planning Specialist

Sharmila040823@gmail.com • LinkedIn • Hyderabad • +91 9581481175

Professional Summary

Workforce Management professional with **8.9 years of total corporate experience**, including **5+ years of specialized expertise in Workforce Management, Talent Planning, and Talent Acquisition**. Strong background in demand forecasting, capacity planning, bench management, utilization optimization, and end-to-end recruitment. Proven ability to align supply with business demand, drive bench-to-bill deployment, enable rapid ramp-ups, and deliver data-driven workforce decisions across multi-site operations. Highly proficient in **Advanced Excel** with excellent stakeholder communication and coordination skills.

Professional Experience

Tech Mahindra **08/2016 – 05/2025**

Workforce Management Lead July 2021 – May 2025

- Managed end-to-end Workforce Management across business units including forecasting, deployment, utilization governance, and bench management.
- Executed the recommended sourcing strategy using priority-sourcing channels via job-boards, employee referrals, internal mobility etc., conducted initial phone screens, maintained candidate data in Pace Fin and Talex tools and provided recruiters/business with highly qualified experienced candidates.
- Mine internal and external database
- Maintained 95%+ utilization performance, improving resource efficiency and reducing idle capacity.
- Built and maintained WFM dashboards, capacity models, RAG status trackers, and utilization reports for leadership.
- Managed bench resources: skill mapping, upskilling alignment, redeployment planning, and billability improvement.
- Monitored attrition patterns, planned backfills, and supported hiring teams with accurate forecasting.
- Ensured clear communication with delivery leaders regarding resource availability, readiness, and allocation gaps.
- Reduced WFM process delays through automation templates and standardized reporting formats.

Key Achievements:

- Increased utilization rate from 89% to 95%.
- Reduced bench ageing with proactive redeployment.
- Automated reporting templates, streamlining processes.
- Facilitated successful ramp-ups and met staffing targets ahead of SLA.

Talent Acquisition Specialist Nov 2019 – May 2021

- Collaborated closely with Delivery and Operations teams to support fulfilment requirements and meet SLAs through proactive pipeline and demand management.
- Led a large-scale volume hiring initiative for Client **Amazon (BPO)**, successfully on boarding **300+ associates** through structured face-to-face hiring drives, targeted sourcing, and process optimization.
- Collaborated with project and business teams to understand demand pipelines and ensure timely staffing readiness.
- Coordinated end-to-end on boarding activities, internal movements, documentation, and resource readiness for project deployment.
- Supported performance management cycles, employee engagement initiatives, and retention interventions for assigned business units.

- Acted as a key liaison between Delivery Managers and Workforce Management teams to enable faster allocation, redeployment, and utilization decisions.

Key Achievements:

- Improved hiring turnaround time and candidate quality through focused sourcing strategies.
- Enhanced coordination between TA, WFM, and Delivery teams, reducing staffing delays.
- Strengthened recruitment data accuracy and pipeline visibility.

Software Engineer Aug 2016 – Oct 2019

- Provided L2 application support for GE's PLM systems, ensuring uninterrupted operations and timely issue resolution.
- Monitored system performance, workflows, and application health, escalating critical incidents as per SLA guidelines.
- Handled incident management, service requests, and root-cause analysis, improving system stability.
- Coordinated with onsite and cross-functional teams to resolve technical issues and ensure seamless project communication.
- Performed data analysis, report generation, and dashboard updates used by project managers and engineering teams.

Key Achievements:

- Ensured 99% system uptime through proactive monitoring and timely incident resolution.
- Recognized for accurate reporting and clear communication with global GE teams.
